Lowrider Truck Revealed

A lowrider truck being built by Craneboy762 has been revealed.

Picture of new low riding truck

Nothing is known of the truck other than what it looks like, the creator has revealed no other info. The truck is a modified Peterbilt 359 8x6 by Trevor.

The ROR Star Issue #3

Ride on Lawn Mower is Being Thought to be Built

No details or pictures as of yet, currently in the idea stage, but its probably a first for the RoR community. Currently being made by TheTitan08.

Dodge Viper Review

Dodge Viper - By KevinMCE & 3dMaxFreak.

Maxspeed: 180kph

Wheelspin: Yes

Drivable: Yes, holding accelerator will result in veering to the left.

F1 Test Track Lapttime: Unable to complete lap, brakes dont function well enough to handle the corners.

Review:

Good car, nice that a car so powerful can drive without too much loss of control. A custom interior makes the car look nice, and the wheel camera can make for an exhilarating driving experience.

9/10

Lexus LS430 Review

Lexus LS430 - By Kitteh & Bonehead

Max speed: 90kph, driving at this speed for a prolonged time causes the car to shake and possibly deform.

Wheelspin: No

Drivable: This car is one of the most drivable cars you'll find.

F1 Test Track Lapttime: 02'03.85 - Good car, only has traction issues when cornering

The ROR Star Issue #3

at high speed, although the cars low speed doesnt allow it to excel on the straights.

Review:

Excellent car, the best damage models i have ever seen, no interior but a nice side camera and a good skin.
Definitely one to download.

10/10

Nissan Skyline GT-R 34 Police Review

Nissan Skyline GT-R 34 Police - By Akoss

Max speed: 215kph

Wheelspin: No

Drivable: Definitely, although extremely fast and powerful, this car isnt all that difficult to drive.

F1 Test Track Lapttime: 01'42.81 - Good to drive, back-end swings out during tight turns, very stable.

Review:

Good car, the skin could do with some work, as its a bit bland, it also uses the standard RoR dashboard, which isnt really a bad thing.

Fast car thats easy to drive and looks relatively nice, plus its a Nissan, only a few of those are in RoR at the moment.

8/10

Kenworth K100 Semi Workhorse Review

Kenworth K100 Semi Workhorse - By Box5Diesel & Lifter

Max speed: 140kph

The ROR Star Issue #3

Wheelspin: No

Drivable: Yes, holding accelerator causes truck to veer to the left.

Load connector works: No, as far as i can tell, the load connector does not work for me.

Review:

Good truck, looks very nice, shame about the load connector not working, though that might be a fault of my own rather than the trucks.

9/10
