Daleks Coming to RoR

Jacob1029 of the RoR Forum is currently working on a 3d project, adding Daleks to RoR, we are currently unsure of how this will work, but he's supplied us with some screenshots of how the project is going.

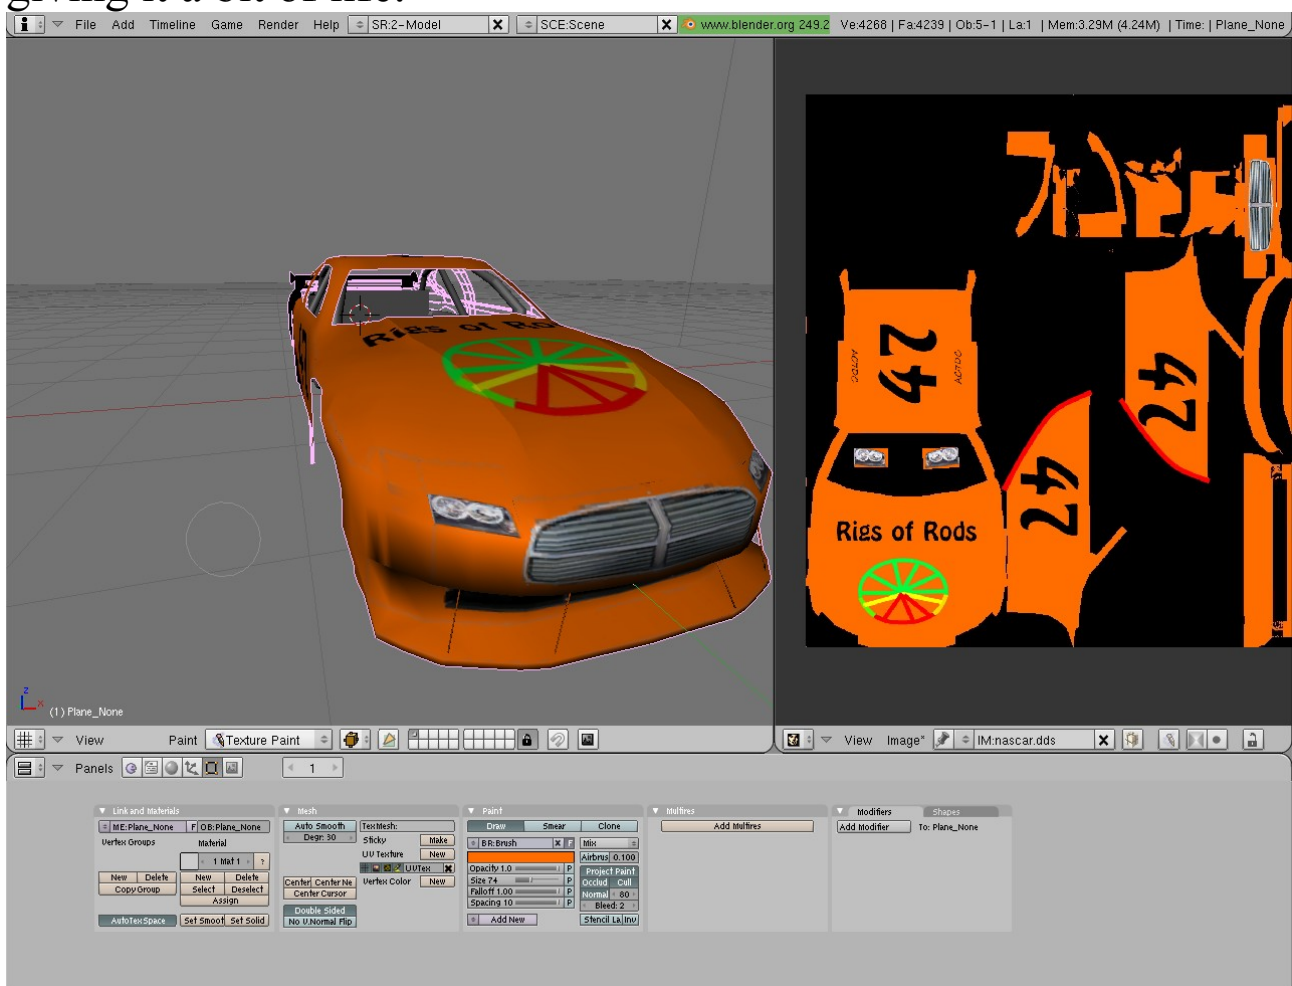

There is a video showing his dalek creation in the RoR Star topic in the Off Topic section of the RoR Forum.

The ROR Star Issue #4

Nascar Stock Car Development Pictures

3dRacer01 is working on a NASCAR project, currently its looking very nice, a slick texture was recently added to the car, giving it a bit of life.

The appearance of the car has vastly improved since the first screenshots were revealed, the creator may still have to brush up on the texture of the vehicle, as it currently looks a tiny bit like play-dough.

The ROR Star Issue #4

Screenshot of Crash Test City (CTC)

I got a vague screenshot of Crash Test City being made by Qer, it appears to be a long runway ending in a large concrete block, obviously to test cars strength and see how well they fair in a crash test.

I shall be very interested to try out a few cars on this terrain once it gets released. The car is a Jeep Cherokee EMS also made by Qer.

The ROR Star Issue #4

DAF Tow Truck Screenshots

In addition to CTC Qer has been working on a DAF Tow Truck, although the appearance is the same as the standard DAF truck, it has a winch bar on the back of it, allowing it to latch onto vehicles and presumably drag them to safety.

This maybe a good alternative to the cranes we usually see on rescue trucks.

The ROR Star Issue #4

S53R Bus Released on RoR Repository

I decided to feature this vehicle in the RoR Star because I thought it looked very nice, you see quite a lot of bus's being added to RoR, the majority looking almost exactly the same. This stood out to me as looking different and detailed.

The screenshot is fairly low resolution, but you should be able to see why it stands out from different buses.

Crash at Penguinville Causes Traffic Jams

A crash happened earlier today when a Dodge Viper and a Chevrolet truck struck a bus in the side whilst they were driving through a red light, the bus suffered relatively minor damage, however the two smaller vehicles have suffered extensive damage.

The ROR Star Issue #4

It has now been confirmed that the Dodge Viper and Chevrolet were street racing and ran through a red light hitting into the side of a bus that had just pulled out of the turning. The traffic jam is expected to be cleared up later today. No one was killed in the accident, however several passengers of the bus and the two drivers in the car have been taken to hospital with injuries.

Acknowledgements

Jacob 1209 for the Dalek Screenshots

3DRacer01 for the NASCAR development screenshots

DPX For the car sales advertisement

Qer for the CTC, Jeep Cherokee EMS and the DAF Tow Truck screenshots

Coco for the Penguinville sightseeing advertisement

Jake2 for the Dodge Viper/Chevrolet bus accident screenshots

Pedro for suggestions on the RoR Star topic, which will be taken into consideration in future issues.

Sorry I was unable to feature the videos that were submitted, they maybe featured in later issues if I have the time.

Thanks to all that contributed to the RoR Star, I hope together we can continue to make this newspaper grow.
