

The Belgian emergency vehicles add-on pack

version 01

-How to install?

The pack is downloadable as one zip-file. This single zip file contains all the vehicles of the add-on pack in separate zip-files. To install the mod; open the single zip-file and copy all the separate zip-files to your packs folder. DON'T put the single zip-file in the folder! Some trucks will already be in the packs folder. You can overwrite them with the new files in the add-on because the files in the add-on pack are most up to date. (eg. the pack includes the two laddertrucks; that overwrite the old ones because there's a small bug in the old ones)

-Can you mod the trucks?

Of course!!! You do not have to ask permission, feel free to use all your creativity. Just leave the name of the original authors unchanged. A suggestion: if you make a mod or a new skin for the truck, then make a new truck out of it by giving it a unique id, so people can enjoy your mod or skin without losing the original truck.

-What's in this pack?

All the trucks in this pack are Belgian emergency service vehicles, especially firetrucks. All the trucks can be found in the category [other vehicles]. I tried to add some nice 0.34 features, like the possibility to spray water.

The pack includes the first released airport crashtender, a police signalisation truck with custom messages, a firetruck pumper and tanker both with full controllable water canon, some reskinned vehicles, ...

-Updates?

I plan to update this add-on pack regularly. Things that will be added in the future are a good working and good looking mercedes sprinter ambulance, some firetruck containers for the ampliroll trucks and other european style fire and emergency equipment. In this updates some details (like custom flares) of the trucks already included in this release will be fixed. This updates will be announced on the forum and the repository

-Thanks to:

- *Pricorde and Thomas for creating RoR, the greatest truck simulator, with almost unlimited possibilities.
- *The original creators of the trucks I modded; all of the credits for this trucks go to them, and they have my everlasting gratitude
- *The moderators and members of the RoR community
- *Real life emergency services, for their hard and riskfull work, for always being ready, and for their efforts to rescue and help people in need.

-Problems or further questions?

If you have a problem and nobody else can help, maybe you can hire THE A-TEAM or you can ask me everything on the forum or by private message.

Enjoy playing,

FONZIE
